National Coalition of Humanitarian Agencies in India

# World Oceans Day

June 08, 2022

***Revitalize Oceans***

***by sustainably using marine  
resource & controlling pollution!***

Sphere India  
National Coalition of Humanitarian Agencies in India

*The health of the oceans  
is tied to our health.*

*Our rainwater, drinking water,  
weather, climate, coastlines, food,  
and even the oxygen in the air we  
breathe, are all ultimately  
provided and regulated by oceans*

Sphere India  
National Coalition of Humanitarian Agencies in India

***Health of oceans is seriously affected due to our actions***

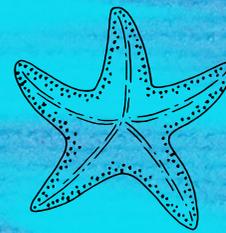

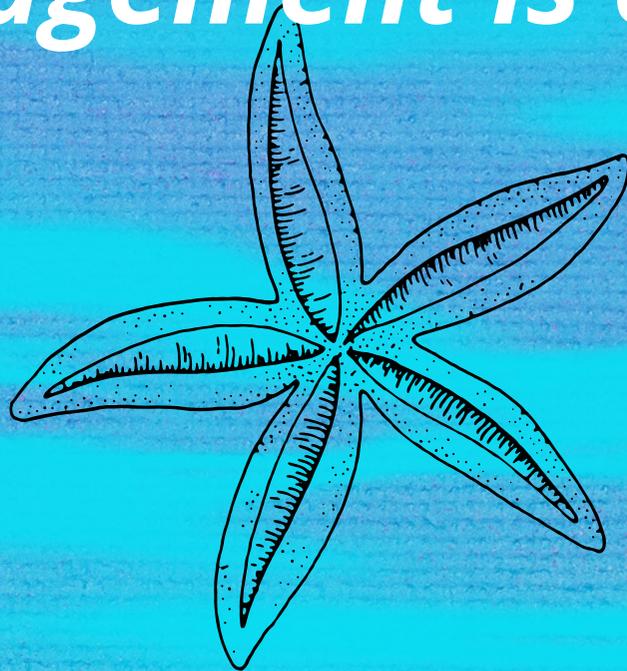

***Continuous deterioration of coastal waters owing to pollution, ocean heat, and ocean acidification are having an adversarial effect on the functioning of ecosystems and biodiversity***

Sphere India  
National Coalition of Humanitarian Agencies in India

# *Sustainable resource management is crucial*

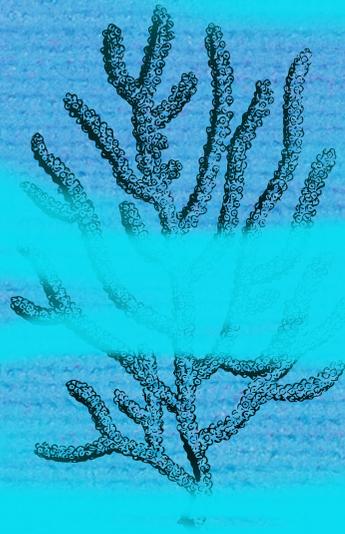

*Marine biodiversity is critical to the  
health of people and our planet.*

*Sustainable use of marine  
resources is inevitable for marine  
biodiversity.*

Sphere India  
National Coalition of Humanitarian Agencies in India

*Plastic waste is  
filling up our oceans*

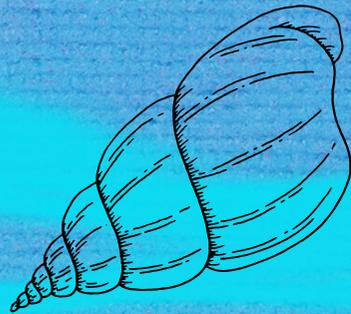

*Plastic ending up in the ocean  
destroys marine life and even  
invade our food chain to get into  
our bodies*

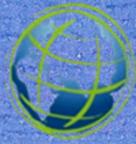

Sphere India  
National Coalition of Humanitarian Agencies in India

# *Large scale oil spills from ships is there to stay*

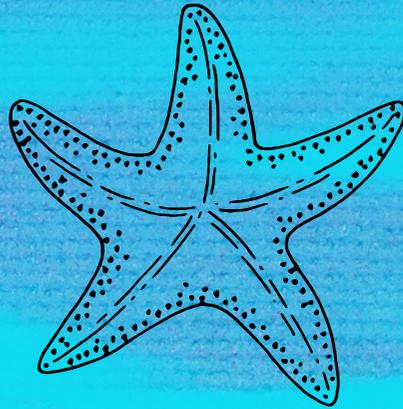

*Crude oil lasts for years in the sea and is extremely toxic to marine life, often suffocating marine animals to death once it entraps them. Crude oil is extremely difficult to clean up*

Sphere India  
National Coalition of Humanitarian Agencies in India

# *Ocean mining is another source of pollution*

*Ocean mining sites drilling for silver, gold, copper, cobalt, and zinc create sulfide deposits up to three and a half thousand meters down into the ocean*

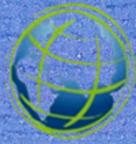

Sphere India  
National Coalition of Humanitarian Agencies in India

# *Toxic chemicals from Industries and farms*

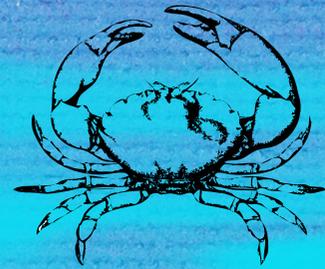

*Industrial and agricultural waste is  
another most common form of  
wastes that are directly discharged  
into the oceans, resulting in ocean  
pollution.*

Sphere India  
National Coalition of Humanitarian Agencies in India

# *Sewage flowing directly into the ocean*

*Sewage or polluting substances flow through sewage, rivers, or drainages directly into the ocean. In India, 80% of municipal sewage is collected of which only 20% is treated and rest are directly discharged into oceans.*

National Coalition of Humanitarian Agencies in India

***Oceans are resilient, but not  
indestructible. If they're to  
last for generations to come,  
we must work together to  
reduce pollution and its  
impact.***
